FRANK W. McLAUGHLIN is Field Executive for the New Jersey Audubon Society, staff naturalist in the Department of Education of the Philadelphia Academy of Natural Sciences, founder and president of the Audubon Wildlife Society of Audubon, N. J., Executive Committee member of the Conservation Council of New Jersey, and a Director of the Philadelphia Conservationists, Inc. A lifetime interest in nature, beginning with his boyhood in rural southern New Jersey, has qualified Mr. McLaughlin as a top-ranking naturalist, wildlife photographer, lecturer and conservationist.

"... to distinguish the delicate fieldmarks..."

Writes FRANK McLAUGHLIN: "Naturalists, both amateur and professional, appreciate the value of split-second critical focusing, brilliance of image and wide field of view in binoculars. These three factors are most important to distinguish the delicate field marks of wildlife — especially when observed moving through the green half-light of a woodland, or hiding among the shadows of fairly dense foliage. My Bausch & Lomb 7x,35 Binocular meets these rigid requirements."
