

A BIBLIOGRAPHY OF NEW YORK STATE ORNITHOLOGY – 1979

JOHN B. BELKNAP, ALLEN H. BENTON, STEPHEN W. EATON,
VALERIE FREER and KENNETH C. PARKES

The Bibliography Committee regularly examines some twenty journals which contain ornithological material. In addition, we attempt to keep track of books published during each year which may contain New York references. Further, we encourage the submission of important references from local publications, even though we do not routinely include items of purely local interest.

The journals which we regularly review include those below. We would welcome suggestions of journals which we should be reviewing, and urge members to send us items which we may have missed.

<i>American Birds</i>	<i>Journal of Animal Ecology</i>
<i>American Midland Naturalist</i>	<i>Journal of Field Ornithology</i>
<i>Animal Behaviour</i>	<i>Journal of Parasitology</i>
<i>Audubon Magazine</i>	<i>Journal of Wildlife Management</i>
<i>Auk</i>	<i>The Kingbird</i>
<i>Behaviour</i>	<i>Linnaean Society News-Letter</i>
<i>British Birds</i>	<i>The Living Bird</i>
<i>Condor</i>	<i>North American Bird Banding</i>
<i>Ecological Monographs</i>	<i>New York Fish & Game Journal</i>
<i>Ecology</i>	<i>New York State Conservationist</i>

Another project of this committee is the publication of a list of all regular publications of member clubs in the Federation. Thus far we have information from 25 clubs. If your club was not one of those to give us this information at last year's Federation meeting, we would like to receive it.

Information, suggestions and bibliographic items should be sent to the chairman, Dr. Allen H. Benton, 292 Water St., Fredonia, NY 14063.

CORRIGENDUM

Please note the following correction in "Photographs of New York State Rarities 39. Ivory Gull" appearing in Vol. XXXI, No. 2, pg. 63. The second paragraph reads as follows:

"This bird was observed and photographed by many people on the following Monday and Tuesday, 12 and 13 January, but disappeared for the rest of the week, only to return on the following Sunday, Monday and Tuesday, 25-27 January; it was not reported thereafter."

The correct dates for the return of the Ivory Gull should be Sunday, Monday, Tuesday, 18-20 January, not 25-27 January as stated originally.
